REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed subject matter in claims 1-2 are allowable because the art of record fail to teach or fairly suggest the claimed "1. (currentlyamended) An equalization method (apparatus in claim 2) for a single carrier wireless transmitter apparatus, comprising: selecting a subset of calculated the feed forward coefficients and a subset of the feedback coefficients wherein a number of coefficients in each subset is less than a total number of the determining coefficients; wherein each coefficient in the subsets of the coefficients is selected based on amplitude of the coefficient satisfying at least one of:

the amplitude is one of a largest coefficient amplitudes of the feed forward filter coefficients or the feedback filter ceoefficients; and the amplitude is bigger than K*.sigma sub, F or K*.sigma sub.B, where, sigma. sub or .sigma sub.B are standard deviations of a subset of coefficients whose amplitudes are not one of the largest coefficient amplitudes of the feed forward filter coefficients or the feedback filter coefficients, wherein K is a threshold parameter that provides protection against coefficient computation noise (see figure 8 and paragraph [50-52]); in combination with determining (claimed circuitry in claim 2) a channel impulse response; calculating feed forward coefficients and feedback coefficients for at least one time domain filter in a decision feedback equalizer based on the channel impulse response.
